

IoT Design Planning Template

IoT design product

Intended function

Outline of the process

Required devices to be connected:

- sensor
- actuator
- intermediate devices

**IoT protocol
considerations**

IoT Design Planning Template

IoT protocol choice

Data:

- type generated
- storage solution
- analysis overview

Programming required:

- device function
- networking requirement
- data management

IoT Design Planning Template

Security and Privacy considerations

- device
- network
- data
